Nature Explorers

Fall is a great time to be outside exploring and learning about what we find! In case of inclement weather we will do indoor activities or make crafts with things we find in nature.

Ages 4-1st grade

Taught by Nicole DeBurton

Mondays 3:00-4:00

6 sessions, Sept 11-October 16

Register on RMS Studio registration form.

Fee: \$80 (\$70 if enrolled in LPU)

Tuesdays

Lego Robotics: Into Orbit

FIRST LEGO League* teams (up to 10 members) research a real-world problem such as food safety, recycling, energy, etc., and are challenged to develop a solution. They also must design, build, program a robot using LEGO MINDSTORMS®, then compete on a table-top playing field.

It all adds up to tons of fun while they learn to apply science, technology, engineering, and math concepts (STEM), plus a big dose of imagination, to solve a problem. Along their journey, they develop critical thinking and team-building skills, basic STEM applications, and even presentation skills, as they must present their solutions with a dash of creativity to judges. They also practice the Program's Core Values, which emphasize discovery, teamwork and good sportsmanship.

The 2018/2019 *FIRST*® LEGO® League season will transport your team into space, where you'll explore, challenge, and innovate in the vast expanse of space. We will field 2 teams this year. Each team will meet once a week on Tuesday or Thursday from 3:30 to 5:00.

There will be no practice the week of conferences. Priority will be given to students that have participated in previous years of FLL.

YEL Junior Coding with Scratch®

STEM Coding Enrichment for the 21st Century learner. Each YEL Coding class follows four basic components: •Teach It!...Students learn different story-telling and coding techniques (movement blocks, animation, dialogue, timing, etc.) •Code It!... Students use Scratch®* to code their own animated story lines: i.e. westerns, missions in space and even dance parties. •Explore It!...Students can write their own code, experiment with it and test new options. We foster a collaborative environment where students learn from each other's creativity. •Keep It!...Students can keep their code online with Scratch® and can access it and expand upon it at any time. Sign up today to THINK, LEARN and PLAY WELL with YEL.

Scratch® is an MIT created and monitored, kid-safe web interface. It uses a drag and drop programming interface to teach students of all levels coding practices. Your child will receive a Scratch user name and password so they can access their projects from any computer at any time.

YEL Fencing

Fencing is one of the fastest growing sports in the USA and Youth Enrichment League (YEL) fencing continues to evolve to match that pace. **Olympic Coach Ro Sobalvarro** heads up YEL's curriculum, ongoing instructor training and tournament consultation. He brings with him an immense knowledge of youth as well as national and international fencing. New students get introduced to a pulse-pounding sport while returning students continue their study through a progressive curriculum. Safety is our first priority. We supply safety swords, protective masks, chest plates and jackets, in a high-octane, inclusive environment.
